THANAL

Date: 1-02-2020
Guide: Ms.Anit James

1. Project Overview?

The project entitled **"THANAL"** is a web-based application for those living with paralysis.The proposed system includes five user's admin, patient, doctor, home nurse and hospital. The application is accessible from anywhere and it will basically lessen the manual work. In this project registered patients can find home nurses. Hospital administrator will add or remove doctors and also send the appointment time for patients who taken the doctor appointment.

2. To what extend the system is proposed for?

It is necessary   to have a system that is more user friendly and user attractive, on such   consideration the system is proposed. In our proposed system patients can take appointment of doctors, hospital administrator send the appointment time to the corresponding patients, doctor view the patientlog, patients can send request for the admin approved home nurse, and admin confirm or reject the requests. The existing system has several limitations and more difficulties to work well. The proposed system provide proper security and reduces the manual work, and it helps the user to work user friendly and he can easily do this job without time delay.
